

## SHORT-COURSE ANNOUNCEMENT

### Governance and Coastal Zone Management

Prof. Marcus Polette

14-18 luglio 2014, ore 10:30, Aula 160/3

#### Course description:

A considerable part of humanity lives in the coastal zone, which concentrates as well megacities more and more complex to be managed due to social and economic distortions increasingly unsteady in relation to environmental conservation. The necessity of plans, programs and projects that can establish bases for long-term spatial planning becomes a major challenge today. The process of coastal management can be considered one of the most effective strategies for decision making based on technical, legal, institutional and administrative tools. In this sense, this course aims to understand the different stages of planning, adoption, implementation and evaluation cycle of integrated coastal management, as well as to analyze its relationship with the governance process, essential to harmonize efficiency and effectiveness in the decision making process.

Monday 14th	Tuesday 15th	Wednesday 16th	Thursday 17th	Friday 18th
The challenges of the Coastal Zone  Strategy and tactics in the Management process	Introduction to Coastal Zone Management	Field trip to Ancona's coastal area (To be chosen by the group)	Practical in Coastal Zone Management  The DPSIR structure	Practical in Coastal Zone Management  Evaluation
